

Aquatic Ecology Research Assistant (Undergraduate)

We are looking for undergraduate students looking to get hands-on lab experience. As an undergraduate research assistant, you would be involved in sample processing, lab maintenance, and data entry. Main duties include: assisting with basic lab research in aquatic ecology/limnology, handling and weighing chemicals, mixing reagents, processing water samples, lab and equipment maintenance, and keeping clear and accurate data record. We are looking for someone responsible, reliable, and with an interest in aquatic ecology, biology, or chemistry. Background in biology, chemistry, and math is desired but not a necessity. This is a great opportunity to become involved in research at OSU and develop your laboratory skills. We can offer up to 30 hrs/week of paid employment.

If you're interested: Please send a copy of your resume to Sarah Wallace at Wallace.629@osu.edu Please be sure to indicate your major, year in school, and any relevant coursework or research experiences.
