Ph.D. Student Position in Fisheries Ecology
Aquatic Ecology Laboratory
The Ohio State University
Columbus, OH

Drs. Elizabeth Marschall (www.ael.osu.edu/people/marschall.2) and Stuart Ludsin (www.ludsinlab.com/) have an opening for a Ph.D. student to begin during fall 2015 or winter 2015-2016. The student would work on a project designed to better understand how human-driven ecosystem change (i.e., climate change, species invasions, eutrophication) influences walleye recruitment in Lake Erie.

**Project description:** Lake Erie’s walleye population has declined in recent decades, owing in large part to low survival during the egg and larval stage. The mechanisms underlying this reduction remain unknown; however, several indicators suggest that the re-eutrophication of Lake Erie, the expansion of non-native benthic species, and continued climate change are altering the lower food web in a way that negatively impacts walleye reproduction.

While we have developed hypotheses to explain how these simultaneous human-driven stressors impact walleye recruitment, as well as some possible first steps for the project, we are seeking a motivated, creative student to work with us and Ohio DNR-Division of Wildlife biologists to identify the exact research questions to ask and approaches to be used. We envision a project with a blend of basic and applied research, which could incorporate field collections (made across the food web), laboratory and/or outdoor mesocosm/pond experiments, and (or) modeling.

**Location:** Successful candidates will join a dynamic, interactive group of students, post-docs, and faculty at The Ohio State University’s Aquatic Ecology Laboratory (http://ael.osu.edu/) within the Department of Evolution, Ecology, and Organismal Biology (http://eeob.osu.edu/).

**Qualifications:** Successful applicants will be creative, motivated, and capable of working effectively both independently and in collaborative groups. A Master’s degree in biology, ecology, general aquatic sciences, or a related field is required; those with a B.S. degree and an exceptional track record of research or related work experience also are encouraged to apply. Strong writing, quantitative, and people-management skills are essential.

**Stipend:** ~$2,325/month plus full tuition waiver and health benefits. Full Graduate Research Associates (GRA) support exists for the degree duration, with opportunities to teach (if so desired).

**Start date:** Fall 2015 or winter 2015-2016.

**How to apply:** Application review will begin on May 15, with applications accepted until a suitable candidate is found. Please email Dr. Stuart Ludsin (ludsin.1@osu.edu) and Dr. Elizabeth Marschall (marschall.2@osu.edu): 1) a letter of interest that briefly describes your educational and research background, as well as your research interests/goals; 2) a curriculum vitae (or resume) that also includes your GRE scores and (if applicable) TOEFL/TSE scores; 3) an unofficial copy of your transcripts; and 4) contact information for at least three professional references.

**Contact information:** For additional information, visit http://www.ael.osu.edu/ or contact Dr. Ludsin or Dr. Marschall at the above email addresses.
